In celebration of 30 years of SIDP, the Inter-Organizational and Engagement Committee would like to highlight several key collaborative projects and recognize the impact SIDP has had on the field of infectious diseases since the beginning of our organization. Attached is a list of 30 key collaborative projects supported by SIDP over the past 30 years. There were far too many to recognize all of the excellent collaborations, but you can explore some of the key highlights below!

1. AACP  11. BPS  21. ISAC
2. AAP  12. BSAC  22. MAD-ID
3. ACCP  13. CDC  23. NFID
4. AMA  14. CIDRAP  24. NPhA
5. APhA  15. CLSI  25. NQF
7. ASCP  17. ESCMID  27. Pharmacy Times
8. ASCPT  18. FDA  28. PIDS
9. ASHP  19. HIVMA  29. SCCM
10. ASM  20. IDSA  30. SHEA
1. American Association of Colleges of Pharmacy (AACP)
In 2019, SIDP collaborated with the AACP Public Health SIG and Infectious Diseases Educator Network to provide an educational session at the AACP Annual Meeting (link).

2. American Academy of Pediatrics (AAP)
In 2011, SIDP collaborated with the American Academy of Pediatrics and 12 other organizations in a letter writing campaign to clarify misinformation and confusion concerning antibiotic misuse in food animals (link).

3. American College of Clinical Pharmacy (ACCP)
In 2009, SIDP collaborated with ACCP Infectious Diseases Practice and Research Network to write a joint opinion paper recommending training and certification for pharmacists practicing, mentoring, and educating in ID pharmacotherapy (link).
4. American Medical Association (AMA)

In 2011, SIDP collaborated with AMA, IDSA, SHEA, APIC, and SHM to provide an educational session on Medscape surrounding antimicrobial stewardship in a community hospital (link)

![AMA Logo]

Online CME Available: Antimicrobial Stewardship in a Community Hospital

A free CME activity outlining practical tools and techniques for implementing antimicrobial stewardship programs at community hospitals is available online at Medscape. The activity features a panel of leading ID specialists, hospitalists, and health system pharmacists discussing the latest information about the most relevant issues related to the challenges, current management, and latest developments for implementation of antimicrobial stewardship principles at non-teaching community hospitals.

The scientific roundtable meeting was presented by the Centers for Disease Control and Prevention (CDC). Cooperating organizations include IDSA, the Society for Healthcare Epidemiology of America (SHEA), the American Medical Association (AMA), the Association for Professionals in Infection Control and Epidemiology (APIC), the Society of Hospital Medicine (SHM), and the Society of Infectious Diseases Pharmacists (SIDP).

5. American Pharmacists Association (APhA)

In 2012, SIDP collaborated with APhA, ACCP, and ASHP to petition the Board of Pharmacy Specialties for an ID specialty, which was accepted in 2016 and went into practice in 2017, replacing the added qualifications program (link)

![APhA Logo]

![BPS Logo]

6. Association for Professionals in Infection Control and Epidemiology (APIC)

In 2018, SIDP collaborated with APIC and SHEA to create a white paper on the synergy between antimicrobial stewardship and infection prevention (link)

![APIC Logo]
7. American Society of Consultant Pharmacists (ASCP)

In 2017, SIDP collaborated with ASCP and ProCE to create a long-term care antimicrobial stewardship certificate program that is still ongoing (ProCE link, SIDP link)

8. American Society for Clinical Pharmacology & Therapeutics (ASCPT)

In 2020, SIDP collaborated with ASCPT and ISAP to organize a pre-meeting workshop on “Translational and Clinical Pharmacology Advances in Anti-Infective Development.” Unfortunately, the final programming was cancelled due to COVID-19 however 😞. Hopefully there will be more collaborations in the future! (link)

9. American Society of Health-System Pharmacists (ASHP)

In 2017, SIDP collaborated with ASHP on a number of educational events at the ASHP Midyear Clinical Meeting (link)
10. **American Society of Microbiology (ASM)**

In 1998, SIDP was recognized as an ASM sister society.

In 2018, SIDP co-sponsored a pre-meeting workshop entitled “Antimicrobial Stewardship: Beyond the Basics” at ASM Microbe and had an area at the opening reception (link).

11. **Board of Pharmacy Specialties (BPS)**

In 2019, SIDP was selected by the BPS as one of the few approved providers of BCIDP recertification. SIDP has provided >24 hours of BCIDP credit in the past year alone, with plenty more to come! (link).

12. **British Society of Antimicrobial Chemotherapy (BSAC)**

In 2021, SIDP is currently collaborating with BSAC to add two SIDP members to the JAC-Antimicrobial Resistance journal, submissions are due July 16, 2021! (link).
13. Centers for Disease Control and Prevention (CDC)
Since 2018, SIDP has collaborated with the CDC to promote Antibiotic Awareness Week (CDC link, SIDP link).

14. Center for Infectious Disease Research and Policy (CIDRAP)
In 2021, SIDP collaborated with CIDRAP and ProCE to provide a 3-part series of presentations surrounding diagnostic stewardship (link 1, link 2, link 3).

15. Clinical & Laboratory Standards Institute (CLSI)
SIDP representatives attend and participate in CLSI Antimicrobial Susceptibility Testing Subcommittee meetings (link), and SIDP also collaborates each year on the annual CLSI susceptibility updates webinar (link to 2020 CE).
16. **Contagion**

In 2021, SIDP launched “Bench to Bedside with SIDP” on ContagionLive.com, where we continue to release articles on a bimonthly basis ([link](#)).

![ContagionLive](image1)

17. **European Society of Clinical Microbiology and Infectious Diseases (ESCMID)**

In 2020, SIDP collaborated with ESCMID to provide an educational session on COVID-19 therapeutics at the ECCVID Conference ([link](#)).

![ESCMID](image2)

18. **U.S. Food & Drug Administration (FDA)**

In 1993, SIDP member Joseph Bertino began serving on the FDA's Anti-Infective Drugs Advisory Committee. Other SIDP members have since served on the committee (Keith Rodvold, Steve Ebert, Annie Wong-Beringer, Diane Cappelletty, Marc Scheetz, Amanda Corbett, and currently Jennifer Le), which is now known as the Antimicrobial Drugs Advisory Committee ([link](#)).

![FDA](image3)
19. HIV Medicine Association (HIVMA)
In 2019, SIDP collaborated with HIVMA and 18 other organizations to sign an open letter supporting the reintroduction of the Strategies to Address Antimicrobial Resistance (STAAR) Act to Congress (link).

20. Infectious Diseases Society of America (IDSA)
In 2019, SIDP became the fifth partner in IDWeek, joining IDSA, SHEA, PIDS, and HIVMA! Registration for the 2021 Annual Meeting is now open (link).
21. International Society of Antimicrobial Chemotherapy (ISAC)

In 2019, SIDP became an ISAC collaborating North American member society (link)

22. Making a Difference in Infectious Diseases (MAD-ID)

SIDP collaborates annually with MAD-ID to help promote and present their Annual Meeting, most recently in May 2021 (link)

23. National Foundation for Infectious Diseases (NFID)

In 2014, SIDP collaborated with NFID, SHEA, IDSA, MAD-ID, and PIDS to create a SHEA White Paper on the knowledge and skills required for antimicrobial stewardship leaders (link)
24. National Pharmaceutical Association (NPhA)

In 2021, SIDP collaborated with the NPhA to release a statement calling on the administration to prioritize equitable access and transparency in vaccine allocation (link)

![National Pharmaceutical Association](image)

A Demand for Equitable Access to COVID-19 Vaccines

COVID-19 continues to disproportionately affect racially and ethnically minoritized groups; with higher cases, hospitalizations, and death rates being reported in non-Hispanic Black, American Indian, and Hispanic Americans when compared to their non-Hispanic White counterparts. To put this into perspective, American Indians are hospitalized nearly 4 times more, and die 2.4 times more than non-Hispanic Whites from COVID-19. Furthermore, non-Hispanic Blacks are hospitalized almost 3 times more and die nearly 2 times more from COVID-19, and Hispanics are hospitalized 3.2 times more and die 2.3 times more from COVID-19 in comparison to non-Hispanic Whites. Disparate outcomes such as these are heavily attributed to structural racism, which has resulted in blatant health inequities amongst these minoritized groups.

25. National Quality Forum (NQF)

In 2015, SIDP worked with the NQF to create the Antibiotic Stewardship in Acute Care Practical Playbook, which includes links to multiple SIDP references (link)

![National Quality Forum](image)

Antibiotic Stewardship in Acute Care: A Practical Playbook

26. Pew Charitable Trusts

In 2019 & 2021, SIDP collaborated with Pew Charitable Trusts and 9 other organizations to voice support for the Developing an Innovative Strategy for Antimicrobial Resistant Microorganisms (DISARM) Act for Congress (link)

![Pew Charitable Trusts](image)

Dear Legislative Leaders:

As healthcare providers from across the country, we write to express our unwavering support for the “Developing an Innovative Strategy for Antimicrobial Resistant Microorganisms Act” (The DISARM Act) which was introduced last year in both the House (H.R.4100) and Senate (S.1712) and is pending bipartisan reintroduction in the 117th Congress. This legislation is urgently needed to address what the Centers for Disease Control and Prevention (CDC) calls “one of the biggest public health challenges of our time”1: Antimicrobial Resistance (AMR). DISARM enjoys bipartisan support from members in both chambers as well as support from the following organizations.

1. "One of the biggest public health challenges of our time" - CDC
27. **Pharmacy Times**

In 2016, SIDP established a strategic partnership with *Pharmacy Times* to provide antimicrobial expertise and ID education to pharmacists on a broader scale ([link](#)).

![Pharmacy Times logo](image1)

28. **Pediatric Infectious Diseases Society (PIDS)**

In 2020, SIDP collaborated with *PIDS, ASHP, and IDSA* to publish updated vancomycin monitoring guidelines for serious methicillin-resistant *Staphylococcus aureus* infections ([link](#)).

![PIDS logo](image2)

29. **Society of Critical Care Medicine (SCCM)**

In 2019, SIDP endorsed the international consensus guidelines for the optimal use of polymyxins in collaboration with *SCCM, ACCP, ESCMID, IDSA, and ISAP* ([link](#)).

![SCCM logo](image3)
30. Society for Healthcare Epidemiology of America (SHEA)

In 2007, SIDP collaborated with SHEA, IDSA, ASHP, PIDS, American Academy of Pediatrics, Infectious Diseases Society for Obstetrics and Gynecology, and Society for Hospital Medicine to create guidelines for the development of institutional antimicrobial stewardship programs (link). These guidelines were subsequently updated in 2016 (link).
